Content Partnerships Program

Eligible Use of Funds:

Eligible expenses include costs and activities directly related to achieving the objectives for which the OCI funding was granted. All procurement activities must conform to the [Broader Public Sector Accountability Act \(BPSAA\)](#).

Eligible Expenses:

1. Actual costs directly attributable to and necessary for the completion of the project and are not wholly or partially for another purpose.
2. One-time costs, directly attributable to implementation of the project; actual cash outlays that must be documented through invoices, receipts, or records - and are subject to verification by an independent auditor.

Evidence of payment must be maintained for audit purposes. Costs incurred outside Ontario are ineligible unless otherwise approved by OCI.

Retroactive Expenses:

OCI will acknowledge expenses after the approval date. In cases where an application is not approved and activated, expenses are incurred at the risk of the Applicant.

Institutional Overhead:

This is an ineligible expense.

Public leverage of OVIN contribution:

Matching contributions from partners must be from private sources. OVIN's funding and/or partners' project contributions cannot be used to leverage other public funds (at the municipal, provincial, and federal level, including directly controlled entities) to support the same project activities and milestones.

Incurring revenues during project: The resources defined and employed to deliver a project financed by OVIN cannot be used to generate concurrent revenues from operations.

Capital Costs:

Capital items (fixed assets) include program activity-related equipment that has residual values as determined by Generally Accepted Accounting Principles (GAAP) at the end of the funding period. The eligible expense items allowed by OCI are the cost of utilization/depreciation of capital item (fixed assets) specifically required for the delivery of the eligible project. Please refer to the Canada [guidelines](#) here. The prorated cost should be entered under "Materials and Regular Equipment" along with the justification.

Notes:

GAAP is a collection of commonly followed accounting rules and standards for financial reporting. The purpose of GAAP is to ensure that financial reporting is transparent and consistent from one organization to another.

Residual Value of an asset, the estimated amount that it will be worth at the end of funding period.

Depreciation is the systematic reduction in the recorded cost of a fixed asset.
